Art Unit: 1614

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 23-57 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,629,327. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are directed to inhibiting tumors angiogenesis while the patent claim is directed to inhibiting undesired angiogenesis with the same drug. The undesired <sup>angiogenesis is</sup> ~~angiogenesis is~~ defined as tumors (see col. 3, lines 8-46).

Claims 23-33, 35-41 and 43-57 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the specific tumors disclosed, does not reasonably provide enablement for the term "tumors". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The term "tumors" in claims 23-33, 35-41 and 43-57 lacks clear exemplifying support in the specification as filed..

Art Unit: 1614

The cancers therapy at remains highly unpredictable, and no example exist for efficacy of a single compound against tumors.

Therefore, based on the unpredictable nature of the invention and state of the prior art, back of guidance and working examples, and extreme breadth of the claims, one skilled in this art could not use the entire scope of the claimed invention without undue experimentation. Changing the term "tumors" to "tumors sensitive to the ~~thalidomide~~ <sup>thalidomide</sup>" would overcome this rejection.
